Terms and Conditions

Mole Valley Green Burial Ground is a wild, natural, environmentally friendly, unspoilt peaceful resting place for your loved ones. Our Burial Ground provides a thriving habitat for wild grasses, wild flowers, birds, insects and other wildlife. A tree is planted after a burial or interment of ashes and the Burial Ground will ultimately evolve into a mature woodland for perpetuity. We leave the burial ground to grow on naturally through the seasons, we do some trimming back of hedgerows outside of the bird nesting months and mow grassy paths during the summer, other than that it is left to grow on to provide a natural, wild, unspoilt, peaceful environment in keeping with the surrounding beautiful Mole Valley and farmland. **With that in mind please note the following Terms and Conditions:-**

- Coffins, Shrouds, or Urns must be environmentally friendly and biodegradable, no chipboard, metal or plastic
- Only one burial or interment of ashes urn per plot
- The plots are arranged to allow enough space and light for the trees to grow
- Embalmed persons are not permitted
- No scattering of ashes permitted
- No headstones, stone chips, wooden crosses, metal, slate or stone plaques, ornaments or vases are permitted on or around the graves or attached to trees, if found they will be removed for your collection
- No artificial items such as windmills, windchimes, artificial flowers, or ribbons may be placed on or around grave or hanging in or attached to trees
- No borders or mowing of any kind around a grave
- Only native traditional trees may be planted
- If you wish to plant any native wildflowers or wildflower seeds it is essential you check with us first for approval, nothing else may be planted. Often commercially bought "wild flower seeds" may be non native specimens
- Any non-biodegradable tributes will be removed 2 days after a burial or interment of ashes
- No seats or benches are permitted
- Dogs are allowed but must be kept on a lead at all times and dog litter picked up and taken away
- The trees we provide are pot grown locally. We plant the trees in the tree planting season (October -March) to give them enough space and light to give them the best chance of survival. There may be times when trees do not grow well and do not survive due to reasons beyond our control. If this happens we will replace with a sapling from our farm which will either be Oak or Wild Cherry at no charge.
- We reserve the right to update our Terms and Conditions if necessary, however the Burial Ground will always remain a natural unspoilt, peaceful resting place for your loved ones for perpetuity

I agree to the above Terms and Conditions:
